SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier:
   - Product trade name: ERISYS® GE-5
   - Company product number: GE5
   - REACH registration number: Not registered
   - Substance name: Butyl 2,3-epoxypropyl ether
   - Substance identification number: EC 219-376-4
   - Other means of identification: Not Available

1.2. Relevant identified uses of the substance or mixture and uses advised against:
   - Uses: Epoxy liquid.
   - Uses advised against: None identified

1.3. Details of the supplier of the safety data sheet:
   - Manufacturer/Supplier: CVC Thermoset Specialties
     2980 Route 73 North
     Maple Shade, New Jersey 08052 United States
     Customer service telephone: +1-856-533-3000
   - For further information about this SDS: Email: cts.customerservice@huntsman.com

1.4. Emergency telephone number:
   - ChemTel (24 hours): 1-800-255-3924 (USA); +1-813-248-0585 (outside USA).

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture:
   - Product classification according to Regulation (EC) 1272/2008 (CLP) as amended:
     - Flammable Liquid, category 3, H226
     - Acute Toxicity, Oral, category 4, H302
     - Skin Sensitizer, category 1, H317
     - Acute Toxicity, Inhalation, category 4, H332
     - STOT, single exposure, category 3, RTI, H335
     - Germ Cell Mutagenicity, category 2, H341
     - Carcinogenicity, category 2, H351
     - Hazardous to the aquatic environment, Chronic, category 3, H412

2.2. Label elements:
   - Product labeling according to Regulation (EC) 1272/2008 (CLP) as amended:
     - Hazard pictogram(s): ![Flammable Liquid, Warning, Skin Sensitizer] (image)
     - Signal word: Warning
     - Hazard statements:
       - H226 Flammable liquid and vapour.
       - H302 Harmful if swallowed.
       - H317 May cause an allergic skin reaction.
H332 Harmful if inhaled.
H335 May cause respiratory irritation.
H341 Suspected of causing genetic defects.
H351 Suspected of causing cancer.
H412 Harmful to aquatic life with long lasting effects.

**Precautionary statements:**
P201 Obtain special instructions before use.
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P261 Avoid breathing dust/fume/gas/mist/vapours/spray.
P264 Wash skin thoroughly after handling.
P273 Avoid release to the environment.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P301+P312 IF SWALLOWED: Call a POISON CENTRE/doctor if you feel unwell.
P302+P352 IF ON SKIN: Wash with plenty of soap and water.
P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P312 Call a POISON CENTRE/doctor if you feel unwell.
P333+P313 If skin irritation or rash occurs: Get medical advice/attention.
P362+P364 Take off contaminated clothing and wash it before reuse.
P370+P378 In case of fire: Use carbon dioxide, dry chemical, foam to extinguish.
P403+P233 Store in a well-ventilated place. Keep container tightly closed.

**Supplemental information:**
Precautionary statements are listed according to the United Nations Globally Harmonized System of Classification and Labelling of Chemicals (GHS) - Annex III and ECHA Guidance on Labelling and Packaging. Regulations in individual countries/regions may determine which statements are required on the product label. See product label for specifics.

**2.3. Other hazards:**
PBT/vPvB criteria: Not Available
Other hazards: No Additional Information

See Section 11 for toxicological information.

### SECTION 3: Composition/information on ingredients

#### 3.1. Substance:

<table>
<thead>
<tr>
<th>CAS-No.</th>
<th>Chemical Name</th>
<th>Weight%</th>
<th>Classification</th>
<th>H Statements</th>
</tr>
</thead>
<tbody>
<tr>
<td>0002426-08-6</td>
<td>Butyl glycidyl ether</td>
<td>99-100</td>
<td>Acute Tox. 4 Inhalation- Acute Tox. 4 Oral- Aquatic Chronic 3- Carc. 2- Flam. Liq. 3- Muta. 2- Skin Sens. 1- STOT SE 3 RTI</td>
<td>H226-302-317-332-335-341-351-412</td>
</tr>
</tbody>
</table>

See Section 16 for full text of H (Hazard) statements (EC 1272/2008).

Amounts specified are typical and do not represent a specification. Remaining components are proprietary, non-hazardous, and/or present at amounts below reportable limits.

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures:

**General:** If irritation or other symptoms occur or persist from any route of exposure, remove the affected individual from the area: see a physician/get medical attention.

**Eye contact:** Immediately flush eyes with plenty of clean water for an extended time, not less than fifteen (15) minutes. Flush longer if there is any indication of residual chemical in the eye. Ensure adequate flushing of the eyes by separating the eyelids with fingers and roll eyes in a circular motion. If eye irritation persists: Get medical advice/attention.

**Skin contact:** Immediately remove contaminated clothing and shoes. Wash the affected area with plenty of soap and water until no evidence of the chemical remains (at least 15-20 minutes). Launder clothing before reuse. If skin irritation occurs: Get...
Inhalation: If affected, remove to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Call a POISON CENTER or doctor/physician if you feel unwell.

Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. Rinse out the mouth with water.

Protection of first aid responders: Wear proper personal protective clothing and equipment.

4.2. Most important symptoms and effects, both acute and delayed:

Dizziness, Drowsiness, Headache, Irritation, Nausea. Preexisting sensitization, skin and/or respiratory disorders or diseases may be aggravated. See section 11 for additional information.

4.3. Indication of any immediate medical attention and special treatment needed:

Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media:

Suitable: Use water spray, ABC dry chemical, "alcohol" foam or CO2. Use water to keep fire-exposed containers cool. If a leak or spill has not ignited, use water spray to disperse the vapors and to protect emergency responders attempting to stop a leak. Water spray may be used to flush spills away from exposures and to dilute spills to nonflammable mixtures.

Unsuitable: None known.

5.2. Special hazards arising from the substance or mixture:

Unusual fire/explosion hazards: Issue warning: combustible liquid. Eliminate all ignition sources. Ventilate the area. If spill is large, be prepared to isolate the hazard area. Deny access to the spill area to persons who are not involved in the cleanup and/or who have not been properly trained in spill management of hazardous/flammable liquids. Vapors may explode if ignited in an enclosed area. Run off to sewer may cause a fire or explosion hazard. Protect product from flames of any kind; maintain proper clearance when using heat devices, etc. Closed container may rupture (due to build up in pressure) when exposed to extreme heat. Product may burn if an ignition source is present. Gives off volatile vapors that are heavier than air and may travel along the ground or may be moved by ventilation and ignited by flame, sparks, heaters, or other ignition sources at distant locations (flashback potential). May form explosive peroxides.

Hazardous combustion products: Irritating or toxic substances may be emitted upon burning, combustion or decomposition. See section 10 (10.6 Hazardous decomposition products) for additional information.

5.3. Advice for firefighters:

Use water/water spray to keep fire-exposed containers cool. Water spray may be used to flush spills away from exposures and to dilute spills to non-combustible mixtures. Do not flush combustible liquids into sewer as a fire or vapor explosion hazard may result. Never direct a hose stream directly onto a burning flammable/combustible liquid. Solid or straight hose stream will cause fire to spread if directed onto a burning spill or into an open container of burning liquid. Wear self-contained breathing apparatus (SCBA) equipped with a full facepiece and operated in a pressure-demand mode (or other positive pressure mode) and approved protective clothing. Personnel without suitable respiratory protection must leave the area to prevent significant exposure to hazardous gases from combustion, burning or decomposition. In an enclosed or poorly ventilated area, wear SCBA during cleanup immediately after a fire as well as during the attack phase of firefighting operations.

See section 9 for additional information.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures:

See Section 8 for recommendations on the use of personal protective equipment. Eliminate ignition sources. Ventilate areas of spill. Personal Protective Equipment must be worn.

6.2. Environmental precautions:

Do not flush liquid into public sewer, water systems or surface waters.
6.3. Methods and material for containment and cleaning up:

Contain by diking with sand, earth or other non-combustible material. Wear proper personal protective clothing and equipment. Absorb spill with an inert material. Place into labeled, closed container; store in safe location to await disposal. Change contaminated clothing and launder before reuse. Remove all ignition sources, as spilled material may polymerize. Remove leaking containers to a ventilated area.

6.4. References to other sections:

See Section 8 for recommendations on the use of personal protection and Section 13 for waste disposal.

SECTION 7: Handling and storage

7.1. Precautions for safe handling:

As with any chemical product, use good laboratory/workplace procedures. Do not cut, puncture, or weld on or near the container. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor, aerosol, mist or gas. Do not ingest, taste, or swallow. Wash thoroughly after handling this product. Always wash up before eating, smoking or using the facilities. Use under well-ventilated conditions. Wash contaminated clothing before reuse. Discard shoes contaminated with this product. Provide eyewash fountains and safety showers in the work area. Bond and ground all containers when transferring chemical. Eliminate ignition sources (e.g., sparks, static buildup, excessive heat, etc.). Use spark-proof tools and equipment. Vapors may travel to distant ignition sources.

7.2. Conditions for safe storage, including any incompatibilities:

Store in combustible storage area and away from heat and open flame. Keep away from heat, sparks and open flames. Store under well-ventilated conditions. Keep container upright, when not in use, to prevent leakage. Avoid storing containers in direct sunlight as vapors may accumulate in the head space creating pressure. Store this material away from incompatible substances (see section 10). Do not store in open, unlabeled or mislabeled containers. Keep container closed when not in use. Product can accumulate static charge when handled. Equipment should be grounded. Emptied container may contain residual vapors or liquid which may ignite or explode. Do not reuse empty container without commercial cleaning or reconditioning. Bond and ground all containers when transferring chemical.

7.3. Specific end use(s):

No Additional Information

SECTION 8: Exposure controls / personal protection

8.1. Control parameters:

Occupational exposure limits (OEL):

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>EU OELV</th>
<th>EU IDELV</th>
<th>ACGIH - TWA/Ceiling</th>
<th>ACGIH - STEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Butyl glycidyl ether</td>
<td>N/E</td>
<td>N/E</td>
<td>3 ppm TWA (skin) (dermal sensitization)</td>
<td>N/E</td>
</tr>
<tr>
<td>Butyl glycidyl ether</td>
<td>UK WEL</td>
<td>Ireland OEL</td>
<td>3 ppm TWA, 9 ppm STEL (skin) (Sensitizer)</td>
<td>N/E</td>
</tr>
</tbody>
</table>

N/E=Not established (no exposure limits established for the listed substances for listed country/region/organization).

8.2. Exposure controls:

Appropriate engineering controls: Always provide effective general and, when necessary, local exhaust ventilation to draw spray, aerosol, fume, mist and vapor away from workers to prevent routine inhalation. Ventilation must be adequate to maintain the ambient workplace atmosphere below the exposure limit(s) outlined in the SDS. Eliminate ignition sources (e.g., sparks, static buildup, excessive heat, etc.).

Individual protection measures, such as personal protective equipment:

Eye/face protection: Safety glasses or goggles required.

Hand protection: Avoid skin contact when mixing or handling the material by wearing impervious and chemical resistant gloves. In case of prolonged immersion or frequently repeated contact, gloves with breakthrough times greater than 480
minutes (protection class 6) are recommended. For brief contact or splash applications, gloves with breakthrough times of 30 minutes or greater are recommended (protection class 2 or greater). Suggested materials for protective gloves: Neoprene, PVC. The protective gloves to be used must comply with the specifications of the EC directive 89/686/EEC and the resultant standard EN 374. Suitability and durability of a glove is dependent on usage (e.g. frequency and duration of contact, other chemicals which may be handled, chemical resistance of glove material and dexterity). Always seek advice of the glove supplier as to the most suitable glove material.

**Skin and body protection:** Use good laboratory/workplace procedures including personal protective clothing: labcoat, safety glasses and protective gloves.

**Respiratory protection:** In case of insufficient ventilation, wear suitable respiratory equipment. Wear an approved respirator (e.g., an organic vapor respirator, a full face air purifying respirator for organic vapors, or a self-contained breathing apparatus) whenever exposure to aerosol, mist, spray, fume or vapor exceed the applicable exposure limit(s) of any chemical substance listed in this SDS.

**Further information:** Eyewash fountains and safety showers are recommended in the work area.

**Environmental exposure controls:** See Sections 6 and 12.

### SECTION 9: Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties:

**9.2. Other information:**

Amounts specified are typical and do not represent a specification.

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity:

Exothermic reactions including polymerization may occur in contact with amines, strong acids, strong bases, strong oxidizing agents and excessive heat.

#### 10.2. Chemical stability:

This product is stable.

#### 10.3. Possibility of hazardous reactions:

Hazardous polymerization will not occur. This product will autopolymerize at very high temperatures.

#### 10.4. Conditions to avoid:

Excessive heat and ignition sources.

#### 10.5. Incompatible materials:

Avoid strong acids, bases, and oxidizing agents. Avoid contact with amines.
10.6. Hazardous decomposition products:
Thermal decomposition may produce smoke, carbon monoxide, carbon dioxide, aldehydes and other products of incomplete combustion.

SECTION 11: Toxicological information

11.1. Information on toxicological effects:

Information on likely routes of exposure:

**General:** Caution must be exercised through the prudent use of protective equipment and handling procedures to minimize exposure. BUTYL GLYCIDYL ETHER: May cause chronic health effects involving blood, central nervous system, kidney and liver based on animal data. Limited evidence of a carcinogenic effect. Possible risk of irreversible effects.

**Eyes:** May cause eye irritation.

**Skin:** May be harmful in contact with skin. May cause skin irritation. May cause allergic skin reaction.

**Inhalation:** Harmful if inhaled. May cause respiratory tract irritation.

**Ingestion:** Harmful if swallowed. Ingestion may cause irritation.

Acute toxicity information: Harmful if inhaled - Category 4. Harmful if swallowed - Category 4.

<tbody>
<tr>
<td>Butyl glycidyl ether</td>
<td>Sensitizer Guinea Pig/ adult</td>
</tr>
</tbody>
</table>

Carcinogenicity: Suspected of causing cancer - Category 2.

Germ cell mutagenicity: Suspected of causing genetic defects - Category 2. BUTYL GLYCIDYL ETHER: Butyl glycidyl ether tested positive in a number of in vitro genetic toxicity assays with and without metabolic activation. Mixed results were observed with the dominant lethal and the mouse micronucleus test.

Reproductive toxicity: Not classified. BUTYL GLYCIDYL ETHER: Reproductive toxicity: In an oral (gavage) prenatal development study, effects observed at the highest dose of 250 mg/kg/day were increased post-implantation embryo loss, decreased litter viability and litter weight; NOAEL (no-observed-adverse-effect-level) for embryo/fetal development=100 mg/kg/day; and NOAEL for maternal toxicity=>250 mg/kg/day (no material toxicity noted during study).

Specific target organ toxicity (STOT) - single exposure: May cause respiratory irritation - Category 3.

Specific target organ toxicity (STOT) - repeated exposure: Not classified. BUTYL GLYCIDYL ETHER: Laboratory animals exposed to the butyl glycidyl ether have shown some evidence of effects on the kidney, liver central nervous system and blood. In a 28-day inhalation study, rats exposed at 188 ppm showed decreased body weight and changes in blood chemistry. Severe irritation of the upper respiratory tract was observed in rats exposed at 94 ppm and 188 ppm. In a chronic toxicity study, male rats exposed at 150 ppm for 50 7-hour exposures demonstrated significantly retarded growth; at 300 ppm doses, there was 50% mortality and additional signs of toxicity including unkept appearance, liver necrosis and significant increase in kidney/body and lung/body weight ratios.

Aspiration hazard: Not classified (no relevant information found).

Other toxicity information: No additional information available.

12.5. Results of PBT and vPvB assessment:

Not Available

12.6. Other adverse effects:

No additional information available.

SECTION 13: Disposal considerations

13.1. Waste treatment methods:

Dispose of unused contents (incineration) in accordance with national and local regulations. Dispose of container in accordance with national and local regulations. Ensure the use of properly authorized waste management companies, where appropriate.

See Section 8 for recommendations on the use of personal protective equipment.

SECTION 14: Transport information

The information below is provided to assist in documentation. It may supplement the information on the package. The package in your possession may carry a different version of the label depending on the date of manufacture. Depending on inner packaging quantities and packaging instructions, it may be subject to specific regulatory exceptions.

14.1. UN number: UN3271

14.2. UN proper shipping name:

Ethers, n.o.s. (butyl glycidyl ether)

14.3. Transport hazard class(es):

- U.S. DOT hazard class: 3
- Canada TDG hazard class: 3
- Europe ADR/RID hazard class: 3
- IMDG Code (ocean) hazard class: 3
- ICAO/IATA (air) hazard class: 3

A "N/A" listing for the hazard class indicates the product is not regulated for transport by that regulation.

14.4. Packing group: III

14.5. Environmental hazards:

- Marine pollutant: Not Applicable
- Hazardous substance (USA): Not Applicable
14.6. Special precautions for user:
   Not Applicable

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code:
   Not Applicable

Notes: For surface shipment within the United States, flammable liquids with a flash point of 100-141 F (38-60 C) may be reclassified: In containers of 119 gallons capacity or less: NOT REGULATED. In containers of more than 119 gallons capacity: COMBUSTIBLE LIQUID.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture
   Europe REACh (EC) 1907/2006: Not all applicable components are registered. Please contact your sales representative for further information regarding REACh compliance. REACh is only relevant to substances either manufactured or imported into the EU. REACh information regarding this product is provided for informational purposes only. Each Legal Entity may have differing REACh obligations, depending on their place in the supply chain. For material manufactured outside of the EU, the importer of record must understand and meet their specific obligations under the regulation.

   EU Authorizations and/or restrictions on use: Not Applicable

   Other EU information: No Additional Information

   National regulations: No Additional Information

   Chemical inventories:

   A "Y" listing indicates all intentionally added components are either listed or are otherwise compliant with the regulation. A "N" listing indicates that for one or more components: 1) there is no listing on the public inventory (or is not on the ACTIVE inventory for U.S. TSCA); 2) no information is available; or 3) the component has not been reviewed. A "Y" for New Zealand may mean that a qualified group standard may exist for the components in this product.

15.2. Chemical safety assessment:
   Not Applicable

SECTION 16: Other information

Hazard (H) Statements in the Composition section (Section 3):

H226 Flammable liquid and vapour.
H302 Harmful if swallowed.
H317 May cause an allergic skin reaction.
H332 Harmful if inhaled.
H335 May cause respiratory irritation.
H341 Suspected of causing genetic defects.
H351 Suspected of causing cancer.
H412 Harmful to aquatic life with long lasting effects.
